The Visible Self Global Perspectives On Dress

The Visible Self-Joanne B. Eicher 2014-08-14 This anthropological investigation of dress featuring selected scholarly readings is ideal for courses focused on global perspectives and cultural aspects of dress.

The Visible Self-Joanne B. Eicher 2008-07-28 Everywhere around the world, people make daily decisions about what to wear or how to dress. The Visible Self, 3rd Edition, presents a systematic approach to analyzing daily rituals that we all share—not simply the act of putting on clothing, but also the method of cleansing the body and adorning it. Using Western and non-Western examples, the authors take a three-pronged approach to understanding dress across cultures, uncovering its relationship to human beings as biological, aesthetic, and social animals. Readings collected from classic books and academic journals enable students to appreciate the complexity of dress from a multidisciplinary perspective that includes anthropology, sociology, economics, fine arts, and the natural sciences.

The Visible Self Joanne Bubolz Eicher 2000 The authors elaborate on what dress is, define ethnocentrism and position dress in todays society. Using Western and non-Western examples, the book fosters an appreciation of the diversity of appearance through a wide variety of purposes served by dress to protect, satisfy and communicate. The Visible Self, 2nd Edition, analyzes the act of dressing - not simply putting on clothing, but cleansing the body and adorning it.

Critical Global Perspectives-Bimaya Subedi 2010-03-01 The primary purpose of this book is to invite educators to rethink what it means to critically conceptualize knowledge about the world. In other words, imagining curriculum in a critical way means decolonizing mainstream knowledge about global societies. Such an approach re-evaluates how we have come to know the world and asks us to consider the socio-political context in which we have come to understand what constitutes an ethical global imagination. A critical reading of the world calls for the need to examine alternative ways of knowing and teaching about the world: a pedagogy that recognizes how diverse subjects have come to view the world. A critical question this book raises is: What are the radical ways of re-conceptualizing curriculum knowledge about global societies so that we can become accountable to the different ways people have come to experience the world? Another question the book raises is: In how do we engage with complexities surrounding social differences such as gender, race, ethnicity, religion, etc., in the global contexts? Analyzing global issues and events through the prism of social difference opens up spaces to advocate for transformative frameworks for a global education curriculum. Transformative in the sense that such a curriculum asks students to challenge stereotypes and engages students in advocating changes within local/glocal contexts. A critical global perspective advocates the value of going beyond the nation-state centered approach to teaching about topics such as history, politics, culture, etc. It calls for the need to develop curriculum that accounts for transnational formations: an intervention that asks us to go beyond issues that are confined within national borders. Such a practice recognizes the complicated ways the local is connected to the global and vice versa and cautions against creating a hierarchy between national and global issues. It also suggests the need to critically examine the pitfalls of forming dichotomies between the local (or the national) and the global or the center and the periphery.

Global Perspectives on Intercultural Communication-Stephen M. Croucher 2017-06-12 What is intercultural communication? How does perspective shape a person's definition of the key tenets of the term and the field? These are the core questions explored by this accessible global introduction to intercultural communication. Each chapter explores the topic from a different geographic, religious, theoretical, and/or methodological perspective, with an emphasis on non-Western approaches, including Buddhist, South American, Muslim, and Chinese perspectives. Featuring the voices of a range of international contributors, this new textbook presents the full breadth of diverse approaches to intercultural communication and showcases the economic, political, and cultural/societal needs for and benefits of communicative competence.

Dress and Identity-Mary Ellen Roach-Higgins 1995 This valuable collection of readings discusses the relationship between dress and identity. Selections from many disciplines present a thorough examination of subjects, such as textiles and clothing, anthropology, sociology, social psychology and women's studies. Some writings are classic statements, others are contributions from recently published books and journals. Each of the books five parts features an introduction that puts entries into context.

Making Senses-Iain Davidson 2021-04-01 Dating back to at least 50,000 years ago, rock art is one of the oldest forms of human symbolic expression. Geographically, it spans all the continents on Earth. Senses are common in some rock art, and recent work suggests that there are some hints of expression that looks like some of the conventions of western art. In this unique volume examining the nature of scenes in rock art, researchers examine what at least 50,000 years ago, rock art is one of the oldest forms of human symbolic expression. Geographically, it spans all the continents on Earth. Sens.

Global Perspectives in the Geography Curriculum-Alex Standish 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by policy makers and politicians. Standish’s careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map. Prof. Dennis Hayes - Oxford Brookes University, UK ‘A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish’s book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geography education for its own sake.’ Dr Jim Butcher, FISGA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools, from a subject which encouraged students to explore spatial concepts, ideas and skills, to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In this book the new approach is critically examined, within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals?

Global Perspectives on Health Promotion Effectiveness-David V. McQuern 2007-06-13 This work is a critical reflection on the state of health promotion effectiveness in practice around the world. It examines the meaning of health promotion from regional perspectives, and explores regions strengths and weaknesses in demonstrating effectiveness. The book goes on to consider issues in public health such as tobacco, mental health, obesity, urbanization, war, and social determinants in order to assess the role of effectiveness, and to examine methodologies for demonstrating effectiveness. The book looks at questions about the effectiveness of health promotion - the debate about the relationship between evidence, impact, and outcomes.

Global Perspectives on Counterterrorism-Amos N. Guiora 2014-11-12 Amos Guiora presents an interdisciplinary and global exploration of the law, policy, intelligence gathering, and operational decisions surrounding counterterrorism initiatives. Case studies of seven different nations: India, Israel, Russia, Spain, the United States and now, China and Colombia and their efforts to repel terrorism within their borders provide numerous opportunities for comparative analysis. Issues to Consider present actual dilemmas and scenarios in each chapter that fuel class discussion. The Second Edition extends its purview to China and Colombia in an ongoing effort to impart a broad perspective on the tactics and strategies used by different countries to combat counterterrorism. An accessible and fascinating text, Global Perspectives on Counterterrorism, Second Edition, features: a practical approach to thinking about a wide variety of issues, including interruptions, the proper forum for trying terrorists, judicial review, international law, intelligence gathering, and policy responses to terrorism simulation exercises that put students in the role of policy and decision-makers.

Evangelization as Interreligious Dialogue John C. Caravini 2019-08-21 What does Jesus have to do with Buddha? What does Muhammad have to do with Krishna? One of the most important tasks for theology in the twenty-first century is interreligious dialogue. Given the rapid process of globalization and the surge of information via the Internet, travel, and library networking today, interreligious dialogue has become a necessary element within Christian theology that no longer can be avoided. Evangelization as Interreligious Dialogue features eleven essays, plus an extensive introduction, that exercise a live conversation between religious others. Divided into four thematic sections—(1) Catholic approaches to interreligious dialogue, (2) dialogues between Judaism and Christianity, (3) dialogues between Islam and Christianity, and (4) dialogues between Hinduism, Buddhism, and Christianity—this volume conducts a sustained theological reflection on the current state of interreligious dialogue by signaling its hopeful promises and unrelenting challenges. The reader will be invited to encounter the religious other firsthand and put his or her most cherished theological assumptions to the test. This book aims to provoke an expansion of horizons for theological imagination as it exposes the basic dialectic of identity and difference as played out in the interaction between diverse religious beliefs, practices, and experiences.

Rediscovering Geography Rediscovering Geography Committee 1997-04-11 As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

It discusses the role of higher education in society, the economic and social functions of higher education, and the future of higher education.

Successful Aging as a Contemporary Obsession Sarah Lamb 2017-05-22 In recent decades, the North American public has pursued an inspirational vision of successful aging—striving through medical technique and individual effort to eradicate the declines, vulnerabilities, and dependencies previously commonly associated with old age. On the face of it, this bold new vision of successful, healthy, and active aging is highly appealing. But it also rests on a deep cultural discomfort with aging and being old. The contributors to Successful Aging as a Contemporary Obsession explore how the successful aging movement is playing out across five continents. Their chapters investigate a variety of people, including Catholic nuns in the United States, Hindu ashram dwellers, older American women seeking plastic surgery, aging African-American lesbians and gay men in the District of Columbia, Chicago home health care workers and their aging clients; Mexican men foregoing Viagra, dementia and Alzheimer sufferers in the United States and Brazil; and aging policies in Denmark, Poland, India, China, Japan, and Uganda. This book offers a fresh look at a major cultural and public health movement of our time, questioning what has become for modern a taken-for-granted goal—aging in a way that almost denies aging itself.

Global Perspectives in Professional Reasoning

Marilyn B. Cole 2016-04-15 "Global Perspectives in Professional Reasoning is the first text of its kind to address the broader scope of occupational therapy practice and the different types of professional reasoning that can be employed; including strategic, political, non-linear and creative reasoning. This text encompasses a wide range of thinking skills and complex processes used by occupational therapists, from reflecting on practice to solving problems, and from clinical reasoning to strategic reasoning. Marilyn Cole and Jennifer Creek and their contributors, are therapists, educators, and students who have explored or done their lives. These models are among the most highly stigmaised health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders, and broke the barrier between the two by giving people with similar challenges and experiences. However, over the same 50-year period, positive change in American public attitudes and stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

The Science of Adolescent Risk-Taking National Research Council 2011-02-25 Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Color Forecasting for Fashion Kate Scully 2012-02-12 Color is a powerful selling tool. It is the first thing to catch the consumer's eye in the shop window. Get the color choice wrong and an entire range can stay on the racks. So, how do colors arrive on the runway or the sales floor and why do different companies all seem to choose similar colors each season? The answer lies in the work of the huge color forecasting industry. Color Forecasting for Fashion breaks down the forecasting process—from how to put together a color palette to color theory and the way that colors behave—and helps you to build the combination of research and intuitive skills that a successful designer or forecastor needs.

Global Perspectives on the Rule of Law James J. Heckman 2013-03-01 Global Perspectives on the Rule of Law is a collection of original research on the rule of law from a panel of leading economists, political scientists, legal scholars, sociologists and historians. The chapters critically analyze the meaning and foundations of the rule of law and its relationship to economic and democratic development, challenging many of the underlying assumptions guiding the burgeoning field of rule of law development. The combination of juriprudential, quantitative, historical/comparative, and theoretical analyses seeks to chart a new course in scholarship on the rule of law: the volume as a whole takes seriously the role of law in pursuing global justice, while confronting the complexity of instituting the rule of law and delivering its promised benefits. Written for scholars, practitioners, and policy-makers, Global Perspectives on the Rule of Law offers a unique combination of jurisprudential and empirical research that will be provocative and relevant to those who are attempting to understand and advance the rule of law globally. The chapters progress from broad questions regarding current rule of development efforts and the concept of rule of law to more specific issues pertaining to economic and democratic development. Specific countries, such as China, India, and seventh century England and the Netherlands, serve as case studies in some chapters, while broad global surveys feature in other chapters. Indeed, this impressive scope of research ushers in the next generation of scholarship in this area.

Global Perspectives on Technology Transfer and Commercialization

John Silley Butler 2011-01-01 As we move further into the 21st century, increasing emphasis is being placed on the importance of technology transfer. Through new research and practices, scholar/practitioners and policymakers have made great strides in broadening our understanding and analysis of the mechanisms by which technology transfer and commercialization processes occur. The fruit of that research is collected in this timely volume. Technology transfer is a dynamic area of study that examines traditional topics such as intellectual property management, the management of risk, market identification, the role of public and private labs, and the role of universities. This volume reflects on how government, business and academia influence technology transfer in different countries and how the infrastructure of a country enhances technology and contributes to each country's overall economy. Interpreting and adopting the processes of technology transfer and commercialization or building innovative ecosystems is critical to seeing success in this digital age. Those leading the surge toward building innovative ecosystems for technology transfer are the fellows of the Institute for Innovation Creativity and Capital (IC2 Institute) at the University of Texas at Austin. Global in its scope of solving market economy problems, for this volume the Institute has focused its lens on accelerated knowledge-based development. Here, scholars from 13 countries come together to critique technology transfer from each of their respective nations. The results of their contributions lend innovative insight to exactly how different nations are working to maximize technology transfer and commercialization in uncertain times. Those with an interest in commercialization and technology transfer, from students to scholars, practitioners to policymakers, will find this important collection of great value.
